

Why should I invest in a personal breathalyser?

It can save you hundreds, possibly thousands of dollars!

- Catching an accidental alcohol reading before it happens will prevent your interlock sentence from being extended.
- When you get your zero alcohol licence you will be liable for another interlock sentence if you drive with any level of alcohol in your system.

It's a great way to keep yourself, friends and family safe!

- Check your alcohol level in less than 30 seconds and get a good understanding of how your body processes alcohol over time.
- Check friends or family if they've been drinking and are planning to drive.

AF-35C | \$199

- Estimated lifespan 2-3 years
- Accurate
- Portable and lightweight
- 12-month warranty

DriveSafe Exec | \$499

- Estimated lifespan 2-5 years
- Accurate, fast and easy to use
